

Specifying your Graphics Card

Pointfuse requires a dedicated graphics card that supports OpenGL 3.3, such as Nvidia Quadro FX Range.

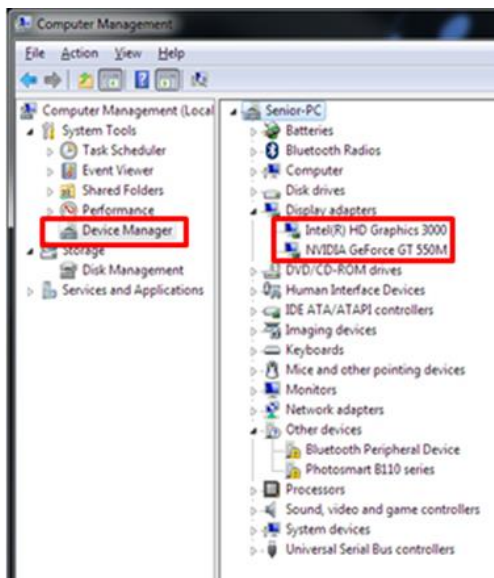

Check Which Graphics Card You Have

Windows 7, Method 1

1. Click **Start**.
2. Right click on **Computer** and select **Manage**.

3. In the **Computer Management** window, select **Device Manager**.
4. Expand **Display adapters** to see which graphics card or cards you have:

Windows 7, Method 2

1. Click **Start** and select **Control Panel**.
2. Click on **Device Manager**.
3. Expand **Display adapters** to see which graphics card or cards you have.

Windows 8

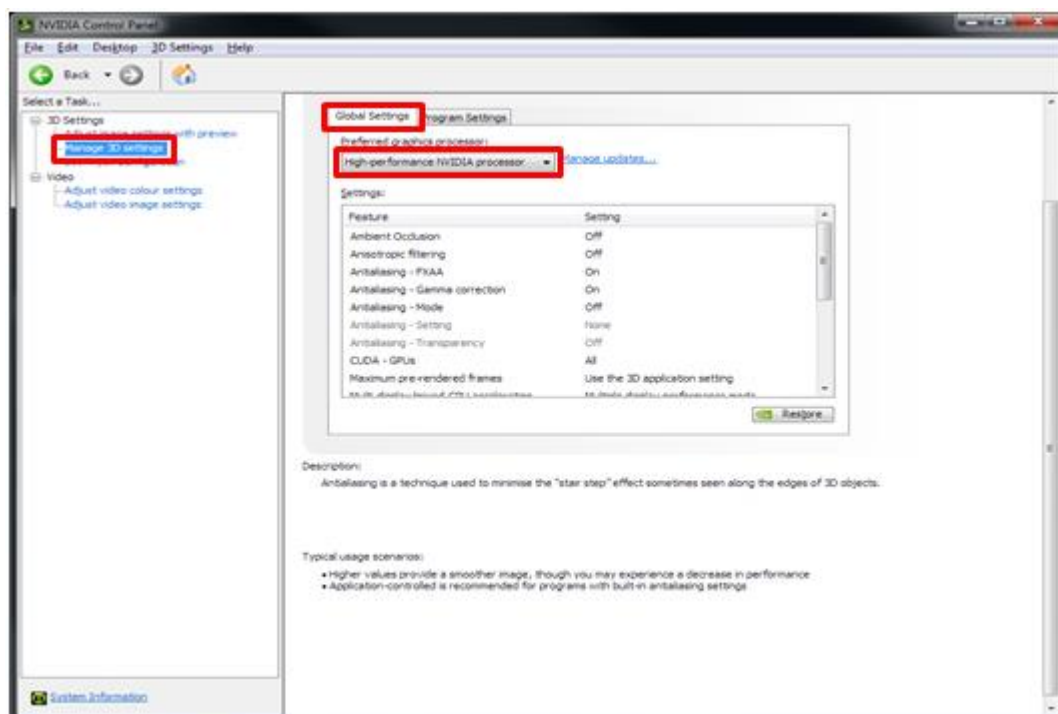

1. Press the **Windows** button and the **X** key (or open the **Control Panel**).
2. Select **Device Manager**.
3. Expand **Display adapters** to see which graphics card or cards you have.

Set Default Graphics Card

Make sure your graphics drivers are up-to-date.

For NVIDIA

1. Right click on the desktop and select **NVIDIA Control Panel**.
2. Expand **3D Settings**.
3. Click on **Manage 3D settings**.
4. On the **Global Settings** tab, select **High-performance NVIDIA processor** from the drop-down list:

For AMD

1. Open the **AMD Catalyst Control Center**.
2. On the **Performance** page, check or change the **3D Performance** settings.
