

WHICH VERSION DO I NEED?

There are two versions of PointFuse: PointFuse, and PointFuse Powered by Jetstream. The latter was created to provide a scan-to-BIM solution within the Leica Jetstream environment. You can purchase core PointFuse licenses in one of three ways, developed to suit your differing business and workflow needs. The table below summarises the key differences across both versions and licenses.

FEATURE/FUNCTION	POINTFUSE		POINTFUSE TEAM	POINTFUSE POWERED BY JETSTREAM
	MONTHLY	ANNUAL	ANNUAL	ANNUAL
Subscription period				
Who is it for?	Reality Capture users looking to use PointFuse on specific projects; or a great way to try out PointFuse.	Reality Capture users who are continually dependent on as-built information for project deliveries.	PointFuse users who wish to scale project efficiencies across their wider team. Full editing and export functionality is provided at a lower cost.	Reality Capture users who are continually dependent on as-built information for projects, using Leica laser scanning technology, who wish to leverage Leica's Jetstream ecosystem.
