

WHICH VERSION DO I NEED?

There are two versions of PointFuse: Standard and Pro. The table below summarises the key differences across both versions and licenses.

PRODUCT NAME	POINTFUSE STANDARD		POINTFUSE PRO	
	STANDARD	STANDARD TEAM	PRO	PRO TEAM
Who is it for?	Reality Capture users dependent on as-built information for project delivery	Users wanting to scale project efficiencies across the team. Full editing functionality at a lower cost	Users looking to add Scan2Plan and Scan2BIM project deliverables with Space Creator	Users wanting to scale project efficiencies across the team. Full editing & export functionality at a lower cost
Import point cloud	✓	✓	✓	✓
Create Mesh models	✓	✗	✓	✗
Mesh classification	✓	✓	✓	✓
Space Creator module	✗	✗	✓	✓
Space Creator export	✗	✗	Unlimited	Unlimited
Annual subscription	✓	✓	✓	✓
Monthly subscription	✓	✗	✗	✗

TEAM LICENSES

Team licenses can only be purchased if you have a current annual license of PointFuse Standard or PointFuse Pro.

POINTFUSE POWERED BY JETSTREAM

Also available PointFuse Powered by Jetstream - a product developed in partnership with Leica Geosystems for users of Leica's 3D laser scanning technology who wish to leverage Leica's Jetstream ecosystem. Annual subscriptions available for both the Standard and Pro versions. The key product difference is the added functionality of viewing and using LGS files. With LGS you can instantly view and use the data without the need for importing, giving you a head start on your project.

PointFuse is a highly sophisticated middleware software, developed to convert point clouds into intelligent 3D mesh data models, quickly and easily. It is widely used across digital construction, space measurement, and 3D visualization applications.
